**ONLINE CESSATION FACILITY**

Speaking: Dr. A Garg, Rishabh Agrawal

Standardized Approach with Personalized Delivery

iCanCaRe UK Higher Center

Everyone got to hear from great personalities like Rajive Kumar sir, Dr. Neetu Bhagat, Dr. Reena Kuma, Dr. A Garg and many more. We came to know about the Many things of tobacco on our health like Smoking is a major risk factor for infections like pneumonia, heart attacks, strokes, chronic obstructive pulmonary disease (COPD) (including emphysema and chronic bronchitis), and several cancers.

There are also bad mental affects on our body. Research has shown that smoking actually increases anxiety and tension. Nicotine creates an immediate sense of relaxation, so people smoke in the belief it reduces stress and anxiety. This feeling is temporary and soon gives way to withdrawal symptoms and increased cravings.

Everyone was introduced to Innovative Cancer Care and Rehabilitation Pvt. Which launched ICanCare app which can help to Leave the bad habit of tobacco. Everyone was very much amazed when we got to know how affective this app can be.

Now if I tell you about my personal experience, I can say it was very informative and knowledgeable session. After attending the webinar I decided I will not smoke , although I don't even do it now. I will try my best to change the thinking of some of my friends who are indulge in smoking or any other bad habits which include tobacco.
